#### **INSIGHTS**

▲ Render blocking requests — Est savings of 1,120 ms

Requests are blocking the page's initial render, which may delay LCP. <u>Deferring or inlining</u> can move these network requests out of the critical path. FCP | LCP |

✓ Show 3rd-party resources (1)

URL	Transfer Size	Duration
railway.app 1st Party	69.4 KiB	450 ms
css/main.a0f97032.css (printer-automation-frontend-production.up.railway.app)	69.4 KiB	450 ms
Google Fonts Cdn	1.2 KiB	790 ms
/css2? family=Inter:wght@300;400;500;600;700&display=swap (fonts.googleapis.com)	1.2 KiB	790 ms

Network dependency tree

<u>Avoid chaining critical requests</u> by reducing the length of chains, reducing the download size of resources, or deferring the download of unnecessary resources to improve page load. [LCP]

Maximum critical	path	latency:	414 ms
------------------	------	----------	--------

Initial Navigation

/?tab=overview (printer-automation-frontend-production.up.railway.app) - 84 ms, 0.72 KiB

...css/main.a0f97032.css (printer-automation-frontend-production.up.railway.app) - 175 ms, 69.41 KiB

/css2?family=Inter:wght@300;400;500;600;700&display=swap (fonts.googleapis.com) - 214 ms, 1.24 KiB

...v20/UcC73FwrK....woff2 (fonts.gstatic.com) - 414 ms, 47.33 KiB

### Preconnected origins

<u>preconnect</u> hints help the browser establish a connection earlier in the page load, saving time when the first request for that origin is made. The following are the origins that the page preconnected to.

no origins were preconnected

### Preconnect candidates

Add <u>preconnect</u> hints to your most important origins, but try to use no more than 4.

No additional origins are good candidates for preconnecting

Layout shift culprits

Layout shifts occur when elements move absent any user interaction. <u>Investigate the causes of layout shifts</u>, such as elements being added, removed, or their fonts changing as the page loads. <u>CLS</u>

Elem	ent		Layout shift score
Total			0.000
		div.mt-2	
			0.000

LCP breakdown

Each <u>subpart has specific improvement strategies</u>. Ideally, most of the LCP time should be spent on loading the resources, not within delays. [LCP]

Subpart	Duration
Time to first byte	50 ms
Element render delay	350 ms

span.text-gray-600

# 3rd parties

3rd party code can significantly impact load performance. Reduce and defer loading of 3rd party code to prioritize your page's content.

3rd party	Transfer size	Main thread time
anmmhkomejbdklkhoiloeaehppaffmdf	0 KiB	26 ms
<pre>chrome-extension://anmmhkomejbdklkhoiloeaehppaffmdf/src/inject/index.js</pre>	0 KiB	17 ms
chrome-extension://anmmhkomejbdklkhoiloeaehppaffmdf/src/content/index.js	0 KiB	9 ms
<pre>chrome-extension://anmmhkomejbdklkhoiloeaehppaffmdf/src/inject/react- scan.js</pre>	0 KiB	0 ms
Google Fonts Cdn	49 KiB	0 ms
v20/UcC73FwrKwoff2 (fonts.gstatic.com)	47 KiB	0 ms
/css2? family=Inter:wght@300;400;500;600;700&display=swap (fonts.googleapis.com)	1 KiB	0 ms

These insights are also available in the Chrome DevTools Performance Panel - record a trace to view more detailed information.

### DIAGNOSTICS

▲ Reduce unused JavaScript — Est savings of 957 KiB

Reduce unused JavaScript and defer loading scripts until they are required to decrease bytes consumed by network activity. Learn how to reduce unused JavaScript. FCP [LCP]

URL	Transfer Size	Est Savings
railway.app (1st Party)	928.1 KiB	736.3 KiB
js/main.e075dd3f.js (printer-automation-frontend-production.up.railway.app)	928.1 KiB	736.3 KiB

	Displays images with correct aspect ratio	

Image display dimensions should match natural aspect ratio. Learn more about image aspect ratio.

Serves images with appropriate resolution

Image natural dimensions should be proportional to the display size and the pixel ratio to maximize image clarity. Learn how to provide responsive images.

Has a <meta name="viewport"> tag with width or initial-scale

A <meta name="viewport"> not only optimizes your app for mobile screen sizes, but also prevents <u>a 300</u> millisecond delay to user input. Learn more about using the viewport meta tag.

Document uses legible font sizes — 100% legible text

Font sizes less than 12px are too small to be legible and require mobile visitors to "pinch to zoom" in order to read. Strive to have >60% of page text  $\ge 12px$ . Learn more about legible font sizes.

Source	Selector	% of Page Text	Font Size
Legible text		100.00%	≥ 12px

Page has the HTML doctype

Specifying a doctype prevents the browser from switching to quirks-mode. <u>Learn more about the doctype</u> declaration.

Properly defines charset

A character encoding declaration is required. It can be done with a <meta> tag in the first 1024 bytes of the HTML or in the Content-Type HTTP response header. <u>Learn more about declaring the character encoding</u>.

No browser errors logged to the console

Errors logged to the console indicate unresolved problems. They can come from network request failures and other browser concerns. <u>Learn more about this errors in console diagnostic audit</u>

No issues in the Issues panel in Chrome Devtools

Issues logged to the Issues panel in Chrome Devtools indicate unresolved problems. They can come from network request failures, insufficient security controls, and other browser concerns. Open up the Issues panel in Chrome DevTools for more details on each issue.

### Page has valid source maps

Source maps translate minified code to the original source code. This helps developers debug in production. In addition, Lighthouse is able to provide further insights. Consider deploying source maps to take advantage of these benefits. <u>Learn more about source maps</u>.

# Redirects HTTP traffic to HTTPS

Make sure that you redirect all HTTP traffic to HTTPS in order to enable secure web features for all your users. <u>Learn</u> <u>more</u>.

### Mitigate clickjacking with XFO or CSP

The X-Frame-Options (XFO) header or the frame-ancestors directive in the Content-Security-Policy (CSP) header control where a page can be embedded. These can mitigate clickjacking attacks by blocking some or all sites from embedding the page. <u>Learn more about mitigating clickjacking</u>.

### SEO

These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on <a href="Core Web Vitals">Core Web Vitals</a>. <a href="Learn more about Google Search">Learn more about Google Search</a>
